To Whom This May Concern:

This is a proposal for directional boring, a 4" casing under Hwy. 515 for service.

Appalachian Cable Installers, Inc. to provide labor and 4" duct. The City of Blue Ridge to provide any traffic control that may be needed.

This job is proposed for \$4200.00 with an additional rock adder of \$15.00/ft, if rock is encountered.

Regards,

Tim Long

Subject: Leakage under 515

Good morning everyone,

We have a leak of unknown size under Hwy 515, this is in front of BB&T bank. The leak is affecting the water pressure for the bank as well as the Title Pawn office. We have been waiting on the DOT permit so that we can bore a new line under 515 and abandon the leaking line. I heard from a DOT representative this morning and we should have our permit by the end of the week. I have attached 2 quotes for the bore and need to get approval from 3 council members to proceed. Because the situation is having a very negative impact on our customers and because they have been waiting a while due to the DOT permit, my recommendation is that we consider how soon the contractors can do the job. Both have done work for the City and do a very good job. I would like an approval as follows:

To allow Appalachian Cable to proceed with the work since they have the lowest quote unless it is going to be more than 10 days before they can be here. In the event that they will be over 10 days and McClure communications (contracted by Holloway Trenching) can get here faster I would like the option to choose them if necessary. If you do not already know BB&T is threatening to call EPD which could result in a fine for us.

Please feel free to let me know if you have any other suggestions or what your thoughts are on this, I just ask that everyone respond quickly in the best interest of the customer and the City.
